J. W. Tooker Dead

J. W. Tooker, father of O. G. Tooker of route three, died at the home of his daughter, Mrs. E. P. Pennoyer, near Aurora, Mo., Thursday, Oct. 24. If he had lived twelve days longer he would have been ninety years old. Funeral services were held Sunday. Mr. Tooker, with his wife, lived in Laclede a number of years. He was a good citizen and a fine man, and his many friends extend their sympathy to the bereaved relatives.

Linneus Yeggmen Escape

LINNEUS, MO., Oct. 29.—The Burlington station here was entered and robbed of \$25 in money and several dollars' worth of tickets last night supposedly by two men seen loitering about the station earlier in the evening. Entrance was gained by breaking the fastening on a rear window in the baggage room. The safe was blown open by a single charge. The precision with which the safe was entered leads local authorities to believe the yeggmen were professionals and members of a supposed gang that has been operating recently in Linn and Livingston counties. Deputy Sheriff F. D. Rohrer of Chillicothe arrived here this morning with bloodhounds but the dogs failed to discover a trail.

A Prompt-Paying Company

The Home Insurance Co. of New York, for which L. W. Libby is local agent, has suffered three losses in Laclede in the past few months—the residences of J. R. Hawes and Dan Anderson and Wm. Kraft's general merchandise stock. In each case the claim was paid in full within one week after the loss occurred. This is a record of which any company might be proud and one which this company maintains at all times, and is one of the reasons why their business is increasing so rapidly.—Adv.

Dr. J. H. Kittredge, the Chillicothe dentist, will be at the Anderson house the 25th and 26th of each month.—Adv.

With all of his experience Mr. Bryan ought to tell Mr. Wilson not to place too much faith in straw votes.

#### Made No Mistake in Van Antwerp

When the Progressive Primary met at Linneus and nominated a full County ticket, they made no mistake in their selection for county treasurer in the person of Dr. E. A. Van Antwerp, veterinary, who has been a resident of Brookfield for twenty years in his professional capacity. He is well known all over Linn county. He is progressive as a citizen, a professional man as well as politically, a man of reliability, and if elected will, without doubt, fill the office with credit to himself and the party that conferred on him the honor of the office.

—THE BUCKLIN HERALD.

The above is a case of the office seeking the man, not the man the office. It was unsolicited.

#### The DeGraw, Brookfield

One of the potent appeals of "The Servant in the House," which will be seen at The DeGraw, Brookfield, on Saturday, Nov. 2, is its remarkable realism. Audiences lose themselves in the unfolding of the beautiful story and awake to the realities of life at the end with a sigh of regret. Commenting on this fact, Harper's Weekly says: "Here is a drama so great, so compelling, so reverent, so akin to all the beautiful and permanent things in life that it is more than a play, more than a novel, more than a mere book. It is a page from life itself, revealing the brotherhood of man as a real, breathing thing; showing how impossible has become possible." According to the critics, "Not in a life-time has such a wonderful play been created."

#### Preventive Medicine

##### MEASLES.

The germ causing measles has not been discovered, but it is known that measles is spread through the secretions of the month and nose, especially during the first few days of the disease. Measles begin with a reddening of the eyes, an inflammation of the nose, and bronchitis. These are the symptoms of a bad cold. For a day or so it can not be determined whether the child is developing a bad cold or measles. During these days, the child is of the greatest danger to its associates.

The prevention of measles consists in separating from the groups of children, those children having the first stages of a cold. At this

time the children should be isolated until it is determined that measles will develop. During an attack of measles and for two weeks after convalescence, the child should be prevented from associating with other children. If the child is

isolated immediately after showing symptoms of a bad cold the number of cases of measles could be greatly reduced.

Address questions on prevention of diseases to Preventive Medicine, University of Missouri, Columbia.
